

# HYBRID HD6200 SERIES

*The impact of IP  
on any analog  
network!*

## Groundbreaking innovation in a great new look.

Teledex iPhone Hybrid phones allow any property, regardless of network infrastructure, to deliver interactive content and applications to the guest room. iPhone Hybrid combines standard analog voice services with a crisp, data-driven color touch screen in a new phone that invites your guests to use the phone in ways they never have before.

With Teledex iPhone, you can keep your existing analog voice infrastructure in place. Then, in the future, when you're ready to convert your property to VoIP, your Teledex iPhone Hybrids can be upgraded to a pure SIP phones with a simple firmware upgrade. You won't have to buy new phones!
